OBJECTIVE

Front-End Web Developer and former Speech Pathologist with strong problem solving and communication skills. Intrigued by ability to leverage JavaScript, HTML, and CSS to create engaging and responsive user interfaces. Currently exploring the whims and powers of CSS by building custom animation for a personal web project.

TECHNICAL PROFICIENCIES

- HTML5, CSS3, JavaScript, jQuery, PHP, MySQL, Laravel.
- Twitter Bootstrap and Google Materialize, Sublime 3, Git and GitHub, Sequel Pro, Heroku, Cloud9, Stripe, Pixelmator.

WEB DEVELOPMENT PROJECTS

- **Peddler's Corner** | Responsible for css, overall look of site and user interface; shared back-end and database tasks.
- **bobbieoconnor.me** | Designed and coded full personal portfolio showcase site, including the linked applications.

SKILLS

Problem Solving

- Developed and implemented programs to train adults in the use of high-tech assistive communication devices.
- Developed and implemented individualized programs focusing on rehabilitation of specific speech, language, and/or swallowing disorders.

Leadership

- Served as a member of the Leadership Team, assisting with administrative concerns and serving as a liaison between administration and staff.
- Volunteered as Technology Committee chairperson, troubleshooting hardware and software issues.
- Led regular status meetings and designed specific programs for over 50 clients.

Communication and Team Work

- Counseled impaired adults and their families, applying strong communication skills, adaptability, and empathy in multicultural environments.
- Conducted in-house training of staff on new technology and proper software implementation.

Organization

- Provided services in a variety of settings while managing multiple tasks and priorities.
- Managed federally-required deadlines with timeliness and accuracy.
